

Portable Pressure Calibration Testkits

With testpumps, adapter set, reference digital gauges or calibrators and portable case

The portable pressure calibration kits LR-Cal LPP-KIT from Leitenberger come with a pressure source (test pump) and reference pressure gauge/calibrator in a portable case.

They allow comfortable, efficient, and very accurate testing, adjusting, and calibrating pressure measuring devices in the field, as well as in workshop or laboratory settings.

Customized Testkit Options

- 1 or 2 pressure test pump
- 1 or 2 reference digital pressure gauge or calibrator
- 1 set of threaded adapters
- 1 rigid transit case with custom foams

Features:

- Accuracy options:
from 0.6% to 0.025% FS
- Pressure range options:
from 0 - 0.1 bar, -1 - 0 bar up to 0 - 1000 bar
- Testpumps:
pneumatic (40/60 bar) or hydraulic (700/1000 bar)
- Reference instruments:
digital gauges, handhelds with sensor or calibrators
calibrators
- Calibration Certificates:
Factory or DAkkS/DKD certificate on request
